

# Build a Bear's Den STEM Activity

**Objective:** To build the strongest bear den that you can with the provided materials.

## Materials:

Play Dough

Craft Sticks or twigs

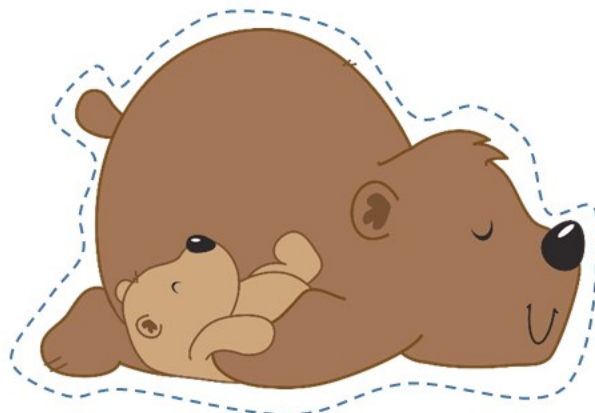

Small Rocks

Cotton Balls (snow)

Bear Figure-Cut out & Laminate for durability

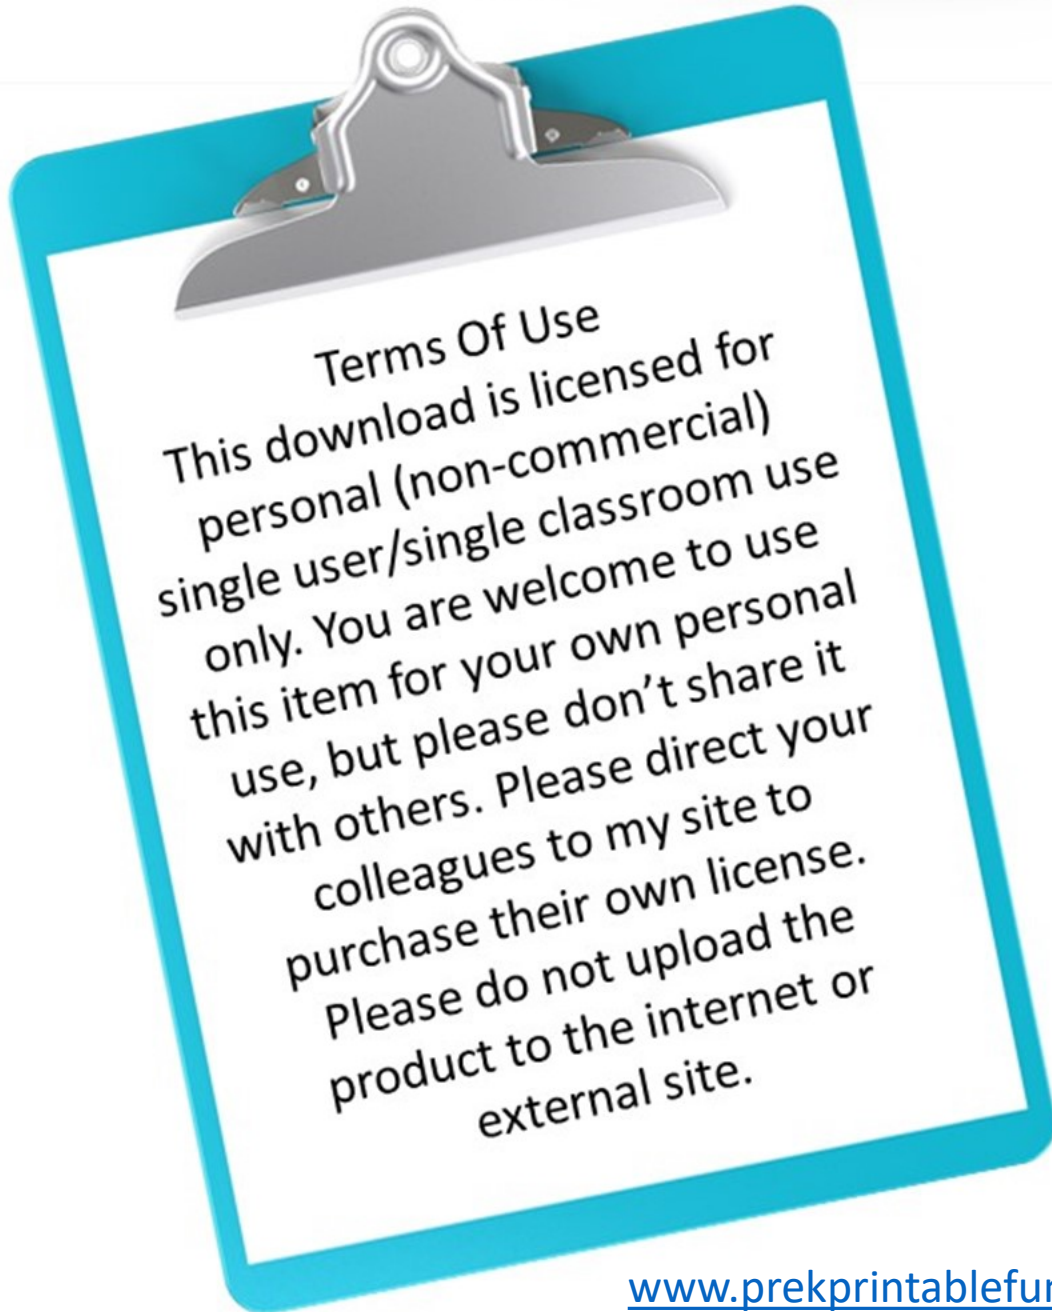

## Directions:

1. Research bear dens.
2. Plan your den design.
3. Construct your den out the building materials provided.
4. Test your den to see if it is strong enough to keep the bear warm during the winter by having it snow (cotton balls) on top of your den.
5. Adjust your design if needed.
